

# Dripping tap Investigation

Name:

Date:

Location of dripping tap:

Amount dripped in	Calculation required	Result
30 seconds	measured	
One minute		
One hour		
One day		
One week		

Who should you report the dripping tap to?

.....

What should be done about it?

.....

*Using a bath will use approximately 80 litres of water. Using a gravity fed shower will use approximately 35 litres.*

Use this information to work out how many showers you could have had with the water that has dripped away in **one week** from this tap.

I could have had ..... showers in one week
